

Computer Training Learner Testimonial

Suzanne's Story

**Suzanne Currie, Microsoft Word graduate - April 2016
Hired at a local Garden Centre**

I re-located to Cornwall from British Columbia in January 2016. I was unemployed for the last 12 months prior. I had been receiving Employment Insurance which was exhausted by the time I arrived here.

My main goal for taking Microsoft Word was to learn how to do my own resume. I had NO knowledge whatsoever of the many tasks I could perform using a computer. I didn't know where to begin, until I came across a pamphlet from Tri-County Literacy Council located in the Resource section of Job Zone. I immediately telephoned and was eventually accepted into the course.

I learned how to make and complete my own resume, reference sheet and job search table to record my active search. Upon completing my resume, the very same day, I circulated it to many businesses and within 3 weeks was offered employment in a garden centre. I begin work at the end of April. **I now have the knowledge and confidence to work in Microsoft Word, thanks to Tri-County Literacy Council.**
